

**ATHENS 2004 OLYMPIC GAMES
VENUE : BASEBALL STADIUM
Athens / Greece**

MARISEAL® SYSTEM:

*Waterproofing of the Stadium Tribunes
and Pedestrian Walkways*

The Athens Baseball Stadium was one of the venues constructed for the ATHENS 2004 OLYMPIC GAMES, to host the internationally watched sporting event.

For this newly constructed stadium, the MARISEAL SYSTEM was chosen as the best solution for surface waterproofing and concrete protection. The MARISEAL SYSTEM was professionally applied and offered an exceptional result both functional and optical.

The MARISEAL SYSTEM was specified because of its ability to waterproof and also offer a wear and abrasion resistant surface.

The MARISEAL® products used for this project where:

PRODUCTS	Properties
MARISEAL® 710	One component, quick drying, premium polyurethane primer.
MARISEAL® 250 	Premium, liquid-applied, highly permanent elastic, cold applied and cold curing, one component polyurethane membrane used for long-lasting waterproofing. Certified by the German state Institute for construction techniques DIBt-Berlin with the European Technical Approval (ETA) and with the CE-mark and certification.
MARISEAL® 420	Pigmented, wear resistant, semi-rigid, color- and UV-stable, weather-stable, cold applied and cold curing, one component aliphatic polyurethane coating used as a top-coat for protection over exposed waterproofing coatings, subject to high wear conditions. Offers increased abrasion resistance, UV stability and excellent chemical resistance.
