

CASE STUDY

Olympic Stadium Roof Waterproofing project in Aleppo, Syria

MARISEAL•SYSTEM

The Olympic Stadium in the city of Aleppo in Syria was one of the biggest waterproofing project to be announced in recent years in Syria.

This 80.000 m² sloping roof was appointed to our agent in Syria to be waterproofed with the **MARISEAL SYSTEM®**. The **MARISEAL SYSTEM®** is the technologically advanced, premium liquid polyurethane waterproofing system that offers easy application, full certifications, and most importantly guaranteed long lasting results. It can be used for any roof or terrace in new construction but also for repair or renewal.

The **MARISEAL SYSTEM®** consists of different products, dependent on the roofs characteristics. In this case the system applied consisted of the polyurethane **MARISEAL 710** primer, the certified one component polyurethane liquid waterproofing membrane **MARISEAL 250** and the aliphatic polyurethane top-coat **MARISEAL 400**.
