

CASE STUDY

Protecting Swimming Pool Coating for the Copa Copana Water Park in Athens

The huge 3500 m² swimming pool complex, consisting of various big and small pools of this public water park in the city of Athens in Greece needed a high quality protective coating that can withstand the expected heavy public use and the test of time.

The MARIPOOL SYSTEM® Protective Swimming Pool coating was selected for this job.

The MARIPOOL SYSTEM® is a premium, technologically advanced, protective pool coating that offers easy and quick application and most importantly long lasting results.

Advantages of the MARIPOOL SYSTEM®

- Easy application
- Forms a seamless protective membrane
- Abrasion resistant
- UV stable
- Water vapor permeable
- Provides excellent adhesion to cementitious surfaces
- Resistant to swimming pool chemicals
