

CASE STUDY

Sandcarpet Balcony Waterproofing at a private residence in Slovenia

The home owner wanted a fresh idea...

So the MARISEAL SYSTEM® Sandcarpet Decorative Waterproofing System was selected for the waterproofing of this balcony.

First the MARISEAL SYSTEM® was used to waterproof the balconies surface.

Then the sandcarpet finish was installed by mixing the colored sand with the transparent, one component, aliphatic polyurethane coating MARITRANS®, and applied by flat trowel, creating a beautiful, hard-elastic, abrasion resistant and anti slip decorative waterproofed floor.

A wide range of colors can be chosen for the sand, meeting every homeowners or architects decorative demand.

MARISEAL SYSTEM®

Advantages of the MARISEAL SYSTEM® Sandcarpet finished waterproofing:

- Provides Waterproofing & Decoration
- Permanent elastic
- UV stable - Color stable
- Anti-slip and impact resistant
- Minimal additional weight and height added to substrate
- Remains flexible over a temperature span of -40°C to +90°C
- Provides excellent adhesion to almost any type of surface
- Can be used for pedestrian traffic
- Resistant to detergents, oils, seawater and domestic chemicals
